ABSTRACT

This Indiana distributive education competency-based curriculum model is designed to help teachers and local administrators plan and conduct a comprehensive marketing and distributive education program. It is divided into three levels--one level for each year of a three-year program. The competencies common to a variety of marketing and distributive occupations form the bases for levels 1 and 2, while common competencies for marketing management positions supply the foundation for level 3. Modified learning objectives, suggested learning activities, and appropriate materials are matched for each competency. Topics covered in level 1 include the scope and role of distributive education, career development, and fundamentals of selling and sales communication: written and oral communications and mathematics in marketing and distribution: personal development, human relations, and ethics: and American business and the free enterprise system. Level 2 covers such additional areas as marketing strategy and promotional mix, product and service technology, stock control and facility safety, and sales promotion. Marketing management competency development in such areas as human relations, communications, mathematics, sales promotion, merchandising, operations, and administration and supervision are outlined in level 3. A bibliography and the addresses of publishers and references are included after level 3. (MN)

FOREWARD

The Indiana Distributive Education Competency Based Curriculum Model has been developed to provide classroom teachers and local administrators with a guide for planning and conducting a comprehensive marketing and distributive education program. The model has been constructed to allow maximum flexibility. A variety of suggested learning activities are provided to enable teachers to select those most appropriate for their teaching styles and their students learning patterns. In addition, a variety of learning materials and references are listed. This allows the teacher to know of and secure the resources suited for teaching/learning the competencies required of marketing and distributive workers.

The research process included a review of the competency research in marketing and distributive education, a jury of experts review and approval of the Crawford common competencies and common managerial competencies, and an one-year field test in fifteen Indiana marketing and distributive education programs.

Many people contributed to the development of the model. Sincere appreciation is extended to advisory committee members: Mr. Robert Ahearn, Herff Jones, Inc.; Mrs. Beth Clark, Carmel High School; Ms. Melanie Devitt, Division of Vocational Education; Dr. Adaline Eastman, Ball State University; Dr. Leona Gallion, Indiana State University; Mr. Lyle Harding, South Bend Washington High School; Mrs. Rebecca Kammeyer, Mississinewa High School; Mrs. Twyla Lamb, Blue River Vocational-Technical Center; Dr. Ralph Mason, Indiana State University; Mr. Jay McGill, Martinsville High School; Mr. Phillip Myers, Division of Vocational Education; Mr. John Sullivan; Burger Chef Systems, Inc.; Dr. Thomas White, Indiana University; and Mr. Robert Wray, Central Nine Vocational-Technical School.

Special recognition is awarded to the field test teachers: Mrs. Alena Brock, Bellmont High School; Mr. Robert Cartwright, Southeastern Indiana Vocational School; Mrs. Judy Commers, Harrison High School; Mrs. Debbie Gabe, Mt. Vernon High School; Mr. Pat Goen, Evansville Harrison High School; Mr. Lyle Harding; South Bend Washington High School; Mr. Dan Keown, Columbus East High School; Mrs. Twyla Lamb, Blue River Vocational-Technical Center; Mrs. Jayne Maxson, Muncie Northside High School; Mr. Thomas Millea, Clarksville High School; Mr. Dennis Montgomery, Anderson High School; Mr. James Rogers, Southeastern Indiana Vocational School; Ms. Jean Stutz, J. Everett Light Career Center; Mr. Laurence Wheatley, South Central Area Vocational School; and Mrs. Mary Ann Zabel, C. A. Prosser Vocational Center.

Thank you is extended to the State Board of Vocational and Technical Education for sponsoring the projects from which the model was developed.

A special thank you is given to Mr. Lee Thompson for developing the first draft of LEVEL 2.

Special appreciation is made to Sue Woodard, Judy Bowan, Pam Burris, Vicki McEntaffer, Jeanne Chappell, and Susan Stippler who worked faithfully and diligently preparing the model for production.

INFORMATION FOR USING THE MODEL

Several factors combined to spark the initiative to develop The Indiana Distributive Education Competency Based Curriculum Model. For years teachers have discussed: "What to teach?" "How to teach it?" "When to teach it?" and "What materials to use?" The model seeks to provide a flexible, yet consistent means for answering these questions. The movement toward competency based vocational education and the desire to expand the program scope beyond retailing to encompass marketing was an influential factor too. In addition, the recent development and availability of curriculum materials prompted the need to organize them for effective use. One other factor has been the increased interest in three-year program structures.

Therefore, the purpose of the model is to provide a flexible curriculum guide based upon researched competencies needed for a variety of marketing and distributive occupations that incorporates the vast amount of materials in a three-year program structure. The model is intended to be a guide only, not a mandated curriculum. Because of the different program characteristics, thro- and three-year programs, laboratory and cooperative, and comprehensive high school and area vocational school, the model is intended to provide a framework which teachers can modify, adjust, and build upon to meet their special circumstances and needs.

Organization of the Model

The model is divided into three levels. One level for each year of a three-year program or the levels can be refined for a two-year program. The Division of Vocational Education course descriptions are appropriate for the levels: Introduction to Marketing and Distributive Education (D.E. I & II) for Level 1, Marketing and Distributive Education (D.E. III & IV) for Level 2, and Marketing Management (D.E. V & VI) for Level 3. Course goals are listed for each level too.

The competencies common to a variety of marketing and distributive occupations form the bases for Levels 1 and 2. Common competencies for marketing management positions supply the foundation for Level 3. For the competencies, modified learning objectives, suggested learning activities, and appropriate materials are matched.

The objectives basically include only the action verb statement. Teachers, considering their program and student variables, may determine the criteria and means of evaluating competency development.

An assortment of student learning activities are suggested. When possible, individual, small group, and large group activities are presented so that the teacher may select the most appropriate. The suggested activities do not preclude the use of other activities that the teacher may develop. In fact, teachers are encouraged to devise other activities that later may be incorporated into the model.

The references matched to the competencies include textbooks, workbooks, DECA materials, manuals, pamphlets, bulletin boards, A-V materials, and

many others. It is not intended that the teacher obtain and use every resource. Rather, the materials listed are intended to save the teacher time and effort searching out, reviewing, and organizing resources. A bibliography and the addresses of publishers and reference sources are included after Level 3.

Planning to Use the Model

To use the model effectively, planning is the key. The model may be used as presented or modified. However, in both situations many points must be considered and decided upon. Program varibles like students, equipment, school setting, and teacher experience should be reviewed.

Time frames must be determined. Two-year programs in comprehensive high schools will not have sufficient classroom time to thoroughly cover all three levels. Area vocational school two-year programs with two-to three-hour laboratories may be able to work through Levels 1 and 2 during the first year of the program. They may, however, have difficulty handling Level 3 during the second year because of meeting only one day per week. Therefore, it is important for the teacher to allocate carefully classroom time for the priority competency-areas.

Also, during the planning, activities must be selected and materials organized. Activities selected may involve teacher and student preparation, as well as, material preparation or duplication. A-V materials usually must be ordered well in advance. Teachers, too, should plan for other important activities that are not incorporated in the model. DECA meetings, conferences, sales projects, school assemblies, and others are not provided for in the model.

The model provides a guide, the teacher must plan to effectively use it.

iv

INDIANA MARKETING AND DISTRIBUTIVE EDUCATION

PROGRAMS/COURSES

The programs/courses and instructional methods listed below are approved for all Local Education Agencies (LEAs) for stated grade levels and credit value. Other courses may be offered for credit provided a course outline is approved by the General Commission of the Indiana State Board of Education and the State Board of Vocational and Technical Education.

GOALS FOR MARKETING AND DISTRIBUTIVE EDUCATION PROGRAMS

- 1. Perform successfully the duties required in retail, wholesale, service, or other marketing occupations at the entry, career sustaining, and specialization job levels.
- 2. Demonstrate the social skills and understandings necessary to successfully perform at the entry, career sustaining, and specialization job levels.
- 3. Communicate in both an oral and written manner that is readily understood and acceptable to customers and associates.
- 4. Perform satisfactorily the mathematical computations that are necessary in retail, wholesale, service, or other marketing occupations at the entry, career sustaining, and specialization job levels.
- 5. Know and use correctly the terminology employed in retail, wholesale, service, or other marketing occupations at the entry, career sustaining, and specialization job levels.
- 6. Demonstrate qualities of leadership in both in-school and out-of-school activities.
- 7. Demonstrate an understanding of, and appreciation for, the American private enterprise system as a cornerstone of the American democracy.
- 8. Demonstrate a knowledge of the opportunities and requirements in marketing and distribution as a career field.

9

INTRODUCTION TO MARKETING AND DISTRIBUTIVE EDUCATION--D.E. I & II
(LEVEL 1)

INTRODUCTION TO MARKETING AND DISTRIBUTIVE EDUCATION

D.E. I & II

Introduction to Marketing and Distributive Education (D.E. I & II) - .5 unit of credit. Basic introduction to the scope and importance of Marketing and Distributive Education, career development, and the Distributive Education Clubs of America (DECA). Emphasis is placed on the importance of leadership and followership in organization structures found in a democratic society, as well as, development of basic job skills necessary to secure, hold and advance in jobs in marketing and distributive occupations. Job skills in human relations, work ethic, job application and interview, oral and written communications, mathematics, selling, sales promotion, marketing functions, and job safety. Also included are basic understanding of the profit motive, channels of distribution, economic understanding and other marketing functions. This course should include simulated occupational experiences and projects in the various marketing functions such as those available through the Distributive Education Clubs of America (DECA) program of activities.

Course Goals for Introduction to Marketing and Distributive Education are:

- 1. Introduce students to the scope and importance of the field of marketing and distribution.
- 2. Introduce students to the co-curricular DECA activities in the Distributive Education program.
- 3. Acquaint students with career opportunities which marketing and distribution offers.
- 4. Assist students in selecting a tentative career objective in marketing and distribution.
- 5. Help students develop skills in the following competency areas needed by students to enter marketing and distributive occupations:
 - a. Human Relations
 - b. Communications
 - c. Mathematics
 - d. Selling
 - e. Sales Promotion

MARKETING AND DISTRIBUTIVE EDUCATION--D.E. III & IV
(LEVEL 2)

MARKETING AND DISTRIBUTIVE EDUCATION

D.E. III & IV

Marketing and Distributive Education (D.E. III & IV) - .5 unit of credit. Intermediate instruction in the scope and importance of Marketing and Distributive Education, a review of career objectives in light of the students' self evaluations related to marketing occupations, and participation in the Distributive Education Clubs of America (DECA) program of activities. Emphasis is placed on American business and free enterprise system, economics of distribution, retailing, service and wholesaling occupations, business and social skills, human relations, ethics, communications, mathematics, selling, product and service technology, sales promotion, operations, stock control and facility safety. This course should include real and/or simulated occupational experiences and projects in the marketing functions such as those available through the Distributive Education Clubs of America (DECA) program of activities. Cooperative on-the-job training may begin during this course to provide real marketing occupations experience.

Course Goals for Marketing and Distribution are:

- 1. Enable students to successfully perform the duties and tasks required in marketing distributive occupations.
- 2. Develop students' ability to secure, hold, and advance in jobs in marketing and distributive occupations.
- 3. Develop students' skills in marketing, basic, social, and economic competencies.
- 4. Enable students to continue to participate in appropriate co-curricular DECA activities.
- 5. Enable students to assess their personal characteristics and needs in relation to their career objectives.
- 6. Enable students to understand the economics of marketing.
- 7. Enable students to understand the psychology of consumer relations.

MARKETING MANAGEMENT--D.E. V & VI (LEVEL 3)

## MARKETING MANAGEMENT

#### D.E. V & VI

Marketing Management (D.E. V & VI) - .5 unit of credit. Provides instruction in the scope and importance of Marketing Management, continuing career identification and development, and further integration of the Distributive Education Clubs of America (DECA) program of activities. Provides advanced instruction including real and/or simulated occupational experiences in the marketing functions to enable students to enter, continue and/or advance in a marketing and distributive occupation. Emphasis is placed on the complexities of marketing management, competency development in human relations, communications, mathematics, retail management, sales promotion, merchandising, operations, administration and supervision. This course should include real and/or simulated occupational experiences such as those available through the Distributive Education Clubs of America (DECA) program of activities. Cooperative on-the-job training may begin or continue during this course to provide real marketing occupational experience.

## Course Goals for Marketing Management are:

- 1. Enable students to begin, continue, and/or advance in supervisory positions in marketing and distributive occupations.
- 2. Introduce students to the complexities of marketing management.
- 3. Further develop students' skills in the marketing, basic, social and economic competencies.
- 4. Enable students to engage in marketing research project(s).
- 5. Enable students to continue to participate in appropriate co-curricular DECA activities.
- 6. Enable students to assess their progress in reaching their career objectives.
- 7. Enable students to understand complex problems of marketing and distribution.
- 8. Enable students to know, interpret, demonstrate, and apply marketing competencies necessary in their selected career objectives.

d.	Skill in identify-
	identify-
	ing a mar
	keting
	research problem.
	problem.

Identify typical types of marketing research problems.

Write a clear and definite statement of the problem for a marketing research project.

List the questions that must be answered to solve this marketing research problem.

e. Skill in planning and organizing a marketing research project.

Develop a calendar that includes all the activities that must be completed to finish a marketing research project.

Plan data-gathering procedures.

Develop data-gathering instrument.

Draw appropriate sample.

Class discussion of various typical marketing research problems.

Small group brainstorming of other marketing research problems.

Survey employers, advisory committee members and other business people to identify marketing research problems.

Students write marketing research problem of interest. Work in small groups to critique and further define the problem.

Class discussion of steps must be planned and organized to conduct a marketing research project.

Individually and as a class, read and discuss data-gathering procedures, instruments, and sample selection.

Review completed marketing research projects for procedures. instruments, and samples.

As individual or member of a group, plan data-gathering procedures. instruments, and select sample for a marketing research project.
